

StressPly® SA System

StressPly SA system incorporates the latest in asphalt adhesive technology. Our self-adhering system is self contained and eliminates the need for a torch, cold adhesives or hot asphalt. Simply position the membrane, remove the release backing and press into place.

Occupant Sensitive

StressPly SA systems deliver high performance while providing an odor free installation for more sensitive building applications

Minimal Equipment

StressPly SA systems are ideal for buildings with restricted access or located in urban environments. Our systems simply require the self-adhering base sheets and the cap sheet

Ease of Application

Our “peel and stick” technology provides significant labor cost savings as compared to conventional roofing. Less site set-up and equipment results in labor cost savings

StressPly® SA System

Features

Benefits

Superior Adhesion

Advanced asphalt adhesive ensures that the completed system has a watertight seal for superior long-term performance

Aesthetically Pleasing

The finished system has a clean monolithic appearance with no unsightly mess or staining. Since the system is totally self-adhering, it eliminates the possibility of asphalt or cold adhesives being tracked across the newly installed mineral cap sheets

Environmentally Friendly

StressPly SA system eliminates the need for kettles, open flames or solvent-based adhesives. This eliminates possible complaints from the potential odors associated with these processes

Superior Strength

Provides long-term protection from tear and splits in the completed roof system. StressPly SA FR Mineral has tensile strengths in excess of 300 lbf/in. making it the strongest self-adhering membrane available in the industry

Occupant Sensitive

StressPly SA FR Mineral systems deliver high performance while providing an odor free installation for more sensitive building applications

User/Application Friendly

Our “peel and stick” technology provides significant labor cost savings as compared to conventional roofing. Less site set-up and equipment results in labor cost savings
