

## Fluid-Applied Membranes / Coatings

# White-Knight® Plus / WC

White-Knight Plus / WC is a fluid-applied roofing system that extends the life of aging roofs by creating a highly durable and waterproof barrier. Its advanced, moisture-triggered technology cures from the top down for faster project completion and increased resistance to tearing and stress. This versatile system is ideal for restoring a variety of commercial roofs while its reflective properties improve energy efficiency and meet strict VOC regulations.

### Fast & Efficient Application

- The fast-curing formula reduces downtime and speeds up project completion
- Sprayable formulation provides fast, even, and seamless coverage
- Quick cure and simple application lower labor time and costs

### Durable, Seamless Waterproofing

- Creates a continuous, flexible membrane for superior waterproofing
- Resists impact, movement, and fatigue with enhanced strength
- Works on single-ply and modified bitumen roofs for broad compatibility

### Sustainable & Code-Compliant Performance

- Reflective white surface reduces heat and extends roof life
- Low-VOC formula meets strict environmental regulations
- CRRC-listed for energy efficiency and sustainability programs

**Quick cure, spray-able, reduces time and labor.**

**Monolithic, durable, flexible waterproofing for various roof types.**

**Energy-efficient, low-VOC, Cool Roof certified for sustainability.**

## Features & Benefits

### Fast, Weather-Ready, and Cost-Efficient

#### Rapid Installation & Weather Protection

- Moisture-triggered formula accelerates drying to reduce downtime.
- Top-down curing creates a rain-resistant surface quickly.

#### Cost-Effective Application

- Faster installation minimizes crew time on site.
- Simplified application helps lower overall labor costs.

### Durable, Versatile Protection for Long-Lasting Waterproofing

#### Seamless, High-Performance Waterproofing

- Continuous membrane for superior protection.
- Enhanced strength resists impact, fatigue, and movement.

#### Versatile & Long-Lasting Protection

- Built for long-term durability in harsh conditions.
- Compatible with multiple roof types for broad use.

### Sustainable, Energy-Efficient, and Code-Compliant Roofing

#### Energy-Efficient Roofing Solution

- Reflective white surface reduces heat and cooling costs.
- Protects against UV damage to extend roof life.

#### Environmentally Compliant & Certified

- Meets environmental regulations for safer, cleaner air compliance.
- CRRC-listed for energy savings, incentives, and sustainability compliance.

**White-Knight® Plus / WC**  
Protect, waterproof, and  
prolong your roof.

## Advantages of White-Knight Plus / WC

UV Protection

Monolithic Waterproofing

Ease of Application

Durable

Chemical Resistant
