

NIGHT-LOCK™

NIGHT TIE-IN FOAM SEALANT

Night-Lock foam sealant provides a clean, secure seal for overnight watertight protection, making it the ideal night tie-in solution for active projects. The foam sealant is highly elastomeric, solvent free, quick setting and specially formulated to save time while keeping the job site protected. Night-Lock replaces asphalt mastics and bitumens or less reliable porous surface foams, significantly reducing the need for additional labor time and specialty materials.

Quick Info

High Rising and Flexible: Fast-acting, high-rise foam accommodates surface irregularities and absorbs stress in the roof system

Easily Installed: Application does not require any specialty tools or significant labor

Environmentally Friendly: Solvent free, low odor and VOC free

Time-Saving: Night-Lock expands to seal the leading edge of the roof cover, setting within minutes

Low Waste: Night-Lock's next day removal is clean and hassle free

THE TOP ATTRIBUTES OF NIGHT-LOCK

AND WHY THEY MATTER TO YOU

High Rising and Flexible – The fast-acting, high-rise foam accommodates surface irregularities and absorbs stress in the roof system.

Why it matters – Night-Lock accommodates surface irregularities to form a watertight seal that keeps the roof system dry. While absorbing stress in the roof system, the highly elastomeric composition also maintains flexibility both during and after installation.

Easily Installed – Night-Lock only requires an application gun and can be installed with minimal labor.

Why it matters – Clean, hassle free application allows you to quickly and easily secure the substrate for the night. And with no specialty tools required, there are significant labor savings for the contractor.

Environmentally Friendly – Night-Lock is solvent free, low odor and VOC free.

Why it matters – Night-Lock's solvent free and low odor composition allows it to be used in any area. And since it is VOC free, Night-Lock's application reduces health risks and increases job site safety as compared to similar products.

Time-Saving – Night-Lock expands to seal the leading edge of the roof cover and sets within minutes.

Why it matters – Night-Lock's unique formulation results in a weatherproof "skin" that is secured and watertight almost immediately. You can rest assured that the system will provide quick and efficient protection.

Quick setting – Its moisture-cure technology accelerates peak weatherability.

Why it matters – This technology allows for fast ultimate wind uplift resistance, which would take months for solvent-based adhesives.

Low Waste – Night-Lock's next day removal is clean and hassle free.

Why it matters – When returning to the project the next day, you can simply cut the sheet where it bridges from the old roof to new roof and remove with the existing tear off. This saves time and reduces the mess that occurs when having to separate both the new and old roof substrate.
