

Fluid-Applied Membranes / Coatings

Black-Knight®/Black-Stallion® Cold

Black-Knight/Black-Stallion Cold is a high-performance, fiber-reinforced adhesive that provides the superior durability of coal tar without the emissions of hot-applied systems. This polymer-enhanced, cold-applied formula naturally resists UV, moisture, and chemical aging while delivering exceptional tensile strength and crack resistance for a sustainable, long-lasting roofing solution.

Eco-Friendly and Emission-Free

- Eliminates harmful emissions associated with traditional hot-applied coal tar
- Provides a cleaner and more environmentally responsible roofing solution
- Cold-applied process ensures a safer, easier installation without the need for kettles or torches

Superior Durability and Protection

- Polymer-enhanced coal tar provides resistance to moisture, chemicals, and UV
- Reinforced with fibers to increase tensile strength and enhance crack resistance
- Long-term protection that stands up to aging and harsh environmental conditions

Seamless Integration with Roof Systems

- Designed as a flood coat adhesive for both asphalt and coal tar roof systems
- Exceptional adhesion and performance for both new and existing roofs
- Superior weather resistance, ensuring long-lasting roof protection

Emission-free, eco-friendly, safer, and easier cold-applied solution.

Polymer-enhanced and fiber-reinforced for long-lasting durability and protection.

Seamless integration, superior adhesion, and weather-resistant roof protection.

Black-Knight®/Black-Stallion® Cold

Features & Benefits

Environmental Stewardship

Eco-Friendly and Emission-Free Eliminates harmful emissions, offering a cleaner, greener roofing solution.

Safe and Easy Application Cold-applied technology requires no kettles or torches, ensuring safer installation.

Exceptional Durability and Long-Lasting Protection

Enhanced Durability and Resistance Polymer-infused coal tar resists moisture, chemicals, and UV, providing long-lasting protection.

Increased Strength and Crack Resistance Fiber reinforcement boosts tensile strength and enhances crack resistance for superior performance.

Compatibility with Roofing Systems

Easy Integration with Roof Systems Engineered as a flood coat adhesive for smooth application on new and existing roofs.

Superior Adhesion and Weather Resistance Delivers exceptional adhesion and long-lasting protection against harsh weather conditions.
