

Black-Knight®/Black-Stallion® Cold

Black-Knight/Black-Stallion Cold is a specially formulated cold-applied adhesive that eliminates many of the emissions of conventional hot-applied coal tar. The polymer-enhanced coal tar provides natural resistance to moisture, chemicals, UV, and aging, improving the long-term performance of the roofing system. Black-Knight/Black-Stallion Cold is also fiber reinforced to provide superior sag resistance, increased tensile strength, excellent crack resistance and improved weathering resistance.

Multi-Purpose

Black-Knight/Black-Stallion Cold is designed to be used as an interply adhesive for Garland's cold-applied Millennium® roof systems; as a flood coat over new and existing hot asphalt and coal tar built-up roofs and modified bitumen roofs; or as a premium restoration material for previously graveled roofs.

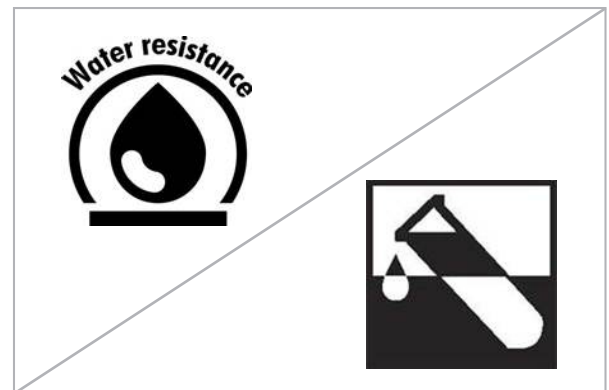

Uniquely Formulated

Black-Knight/Black-Stallion Cold is a specially formulated blend of refined tars, solvents, rubberized polymers, and fibers that offer improved performance and superior sag resistance.

No Fumes, Kettles or Torches

This cold-process adhesive eliminates many of the harmful emissions of a conventional hot-applied coal tar system while providing the same performance benefits. It also eliminates the need for kettles or torches.

Unmatched Durability

Coal tar pitch provides natural resistance to moisture, chemicals, UV, and aging. The polymer-enhanced coal tar used in Black-Knight/Black-Stallion Cold combines the water resistance of coal tar with the strength and flexibility of advanced polymers for unmatched durability.

Black-Knight®/Black-Stallion® Cold

Features

Benefits

Resistance to Weathering

The tight molecular structure of Black-Knight/Black-Stallion Cold provides a natural resistance to moisture, air and UV damage

User Friendly Application

Due to its cold-applied process, there is no need for kettles or torches, allowing for cleaner and easier application

Chemical Resistance

Black-Knight/Black-Stallion Cold's unique formulation provides excellent chemical resistance to petroleum products, salts, fats, acids and other contaminants

Cost Effective

Black-Knight/Black-Stallion Cold offers superior long-term performance and low maintenance costs, significantly reducing life-cycle costs associated with the roofing system

Self-Healing

The cold-flow properties of Black-Knight/Black-Stallion Cold allow it to slowly heal hairline cracks and alligating with elevated rooftop temperatures

No Fumes

The cold-applied nature of Black-Knight/Black-Stallion Cold eliminates many of the harmful emissions of conventional coal tar products. Additionally, this high-performance adhesive is VOC compliant and can be used in all areas

Fiber Reinforced

Black-Knight/Black-Stallion Cold is fiber reinforced to provide superior sag resistance, increased tensile strength, excellent crack resistance and improved weathering resistance

Versatile Performance

Black-Knight/Black-Stallion Cold performs well in a wide range of temperatures and has excellent low temperature flexibility, accommodating building movement and stresses
