

R-Mer® Span I-Span Anchor Clip

Continuous Clip for the R-Mer Span Standing Seam Roof System

OVERVIEW & FEATURES

R-Mer Span I-Span Anchor Clip provides optimized performance in the toughest negative wind uplift pressure environments. Constructed on extruded 6005-T5 aluminum, this is a specialty accessory to the R-Mer Span Standing Seam Roofing system. It may be used instead of the standard 16 Gauge one piece clips in applications over Z-Channels or open framing, or anywhere severe loading drives the need for enhanced attachment.

DESIGN CHARACTERISTICS

- Available in standard lengths of 18' or 20'
- Maximum allowable span of 8'
- May be used in conjunction with standard, one piece clips

FEATURES AND BENEFITS

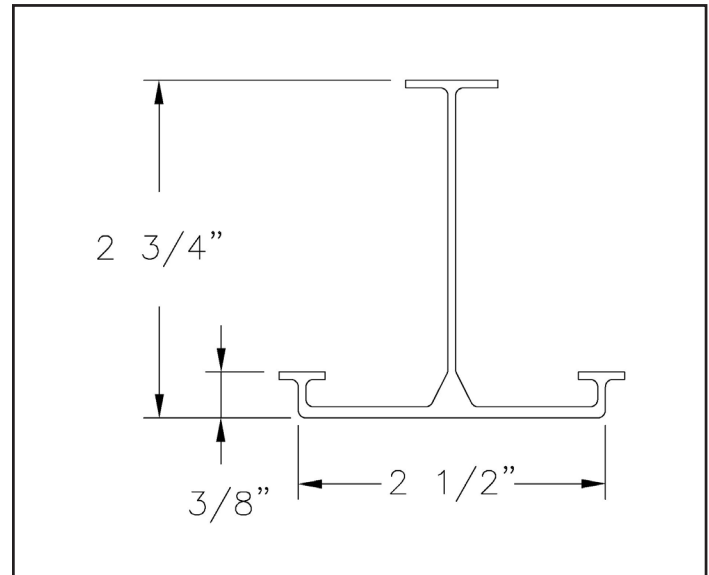

High-Performance Materials- The R-Mer Span I-Span Continuous Clip is made from lightweight but tough, extruded aircraft grade aluminum alloy 6005-T5.

Simplify Retrofit Applications- I-Span may eliminate the need to add expensive framing to an existing building in a roof retrofit project.

Strengthens the Roof System without Taking Away from Aesthetics- I-Span enhances the wind uplift capacity along the vulnerable roof perimeter, invisibly, from inside the seam. This eliminates the use of unsightly wind clamps on the roof panel seams.

Engineering Design- Garland will design the proper usage of the R-Mer Span Continuous Clip based on the specifics of the particular roof.

R-MER SPAN CONTINUOUS CLIP

Technical Data	R-Mer Span Anchor Clip
Alloy	6005-T5
Wall Thickness	0.062" U.O.N.
Radius	0.062 ±0.016 (typ)
Area	0.563 sq. in.
Weight	0.66 lbs./ft.
Die Size	6 in.
Corners	.016" (typ)

R-Mer Span I-Span Anchor Clip is protected by U.S. 6,354,045 and Canada 2,334,538
