

# Silver-Shield® & Garla-Brite®

Silver-Shield and Garla-Brite are premium quality, high solids, fibrated or non-fibrated aluminum roof coatings formulated from specially selected asphalts, oils and resins. They combine the waterproofing capabilities of an asphalt roof coating with the reflectivity of aluminum paint, increasing the life expectancy of your roof system.

non-coated

coated

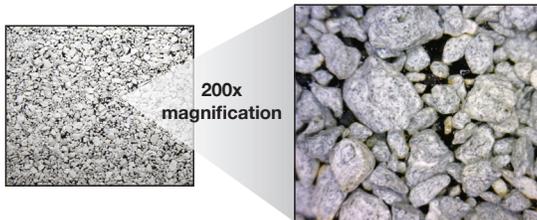

## Saves Energy

The application of aluminum coatings can reduce under roof temperatures by 15 degrees or more. As a result, the workload on the building's air conditioning system is reduced, improving the life cycle of the HVAC system and making the interior environment more comfortable.

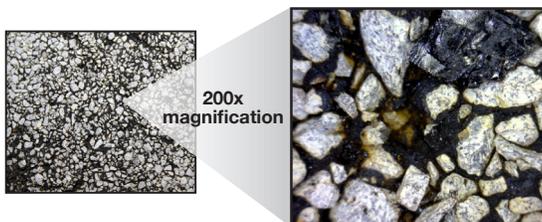

## Improves Building Appearance

Aluminum coatings provide a bright, attractive roof surface that improves the building's appearance. These coatings form a long lasting metallic surface that preserves and protects the roof surface and the roof system below.

5 year aged mineral surfaced

## Extend Longevity of the Roof System

An aluminum coating will block ultraviolet rays that slowly break down asphalt roofing. By coating the membrane, it will increase the life of these sheets and protect them from UV degradation.

# Silver-Shield® & Garla-Brite®

## Features

## Benefits

### **Superior Protection**

Silver-Shield and Garla-Brite will reflect 61 percent to 74 percent of the UV light hitting the roof surface. This process will effectively extend the life of the roof system and allow you to maximize the life-cycle cost of your roofing system.

### **ENERGY STAR® Rated**

With 74 percent reflectance, 33 percent emittance and a Solar Reflectance Index (SRI) of 77, Garla-Brite is an ENERGY STAR\* rated roof coating and one of the brightest aluminum roof coatings on the market today.

### **UV Resistant**

These high-performance asphaltic aluminum coatings protect the existing roof from the harmful effects of UV - greatly reducing thermal shock. Providing added UV protection prolongs the life of the roof, while helping maintain internal temperatures and reducing cooling costs.

### **User Friendly**

The ease of application makes Silver-Shield and Garla-Brite extremely fast and simple to install. These superior coatings can be used to coat wall flashings, make spot repairs or refresh entire roofing systems.
