

Intumescent Primer

Pro-Stop™ FR

Pro-Stop FR applies to wood components of roofing assemblies to create a protective barrier when exposed to high temperatures and flame that inhibits spread of fire and smoke.

Fire-Resistant

- Creates a char-barrier to protect substrate
- Continued protection on multiple exposures
- Also serves as thermal barrier and vapor retarder

Applicator-Friendly

- Ready-to-use, apply with roller, brush, or spray
- Water-based, low-odor
- Dries quickly

Outstanding Versatility

- Water-Based
- Allows safe use of rapidly renewable & natural wood components and decking in roof assemblies

Peace of mind with wood components.

A thermal barrier you can rely on.

An additional level of protection.

Intumescent Primer Pro-Stop FR

Features & Benefits

Protection and Security

Creates char-barrier

Pro-Stop FR swells when exposed to flame and extreme temperature, forming a protective shell around its substrate.

Multiple exposures

When lab tested for multiple exposure to flames, Pro-Stop FR continues to protect the wood substrate.

Thermal and vapor protection

Pro-Stop FR also serves as a non-prescriptive thermal barrier and provides a Class III Vapor Retardancy, adding an additional level of thermal comfort and indoor air quality.

Ease of application

Ready-to-use

Pro-Stop FR can be applied by brush, roller or 3,300 psi spray gun. At 8 mils of wet film thickness it is ready to protect.

Cures fast

Pro-Stop FR dries in as little as 60 minutes and cures completely in 24 hours.

Low odor

Pro-Stop FR is water-based, contractor-friendly, and low-odor.

Sustainable

Promotes use of wood components

As more buildings look to renewable materials, Pro-Stop FR provides an additional layer of protection for wood components.

There's Nothing More Sustainable Than a Roof That Lasts.™
