

# Sunburst™ Minerals

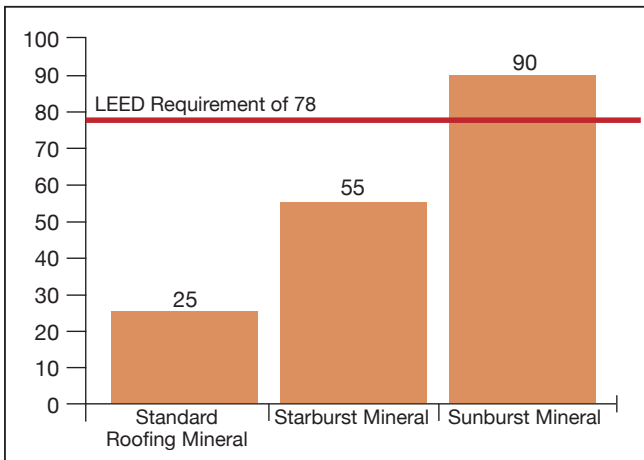

Garland membranes surfaced with highly-reflective Sunburst minerals provide a superior reflective surface that reduces rooftop temperatures and enhances energy efficiency without the additional step of a field-applied coating.

### Standard on the Following Products:

- StressPly® EUV FR Mineral
- StressPly Max FR Mineral
- StressPly IV UV Mineral
- StressPly IV Plus UV Mineral

### Solar Reflectance Index (SRI)

### Upgrade Option on the Following Products:

- StressPly Plus FR Mineral
- StressPly E FR Mineral

### Sunburst Eco-Facts

<b>Reflectance</b>	0.73
<b>Emittance</b>	0.89
<b>SRI</b>	90

# Sunburst Minerals

## Features

## Benefits

### Extreme Reflectivity

### Factory Incorporated Highly-Reflective Surface

- Reduces rooftop surface temperatures
- Reduces the effects of urban heat-islands
- Meets California Title 24 product criteria
- Cool Roof Rating Council (CRRC) ([coolroofs.org](http://coolroofs.org))

### Unmatched Durability

### Excellent Surface Durability and UV Protection

- Superior surface protection against heat, UV and solar radiation
- Provides extreme hail, wind and weather protection
- Impact resistant to foot traffic and mechanical impact
- Fire-rated, tested and approved through Factory Mutual

### Cost Effective

### Reduced Building Operational and Installation Costs

- Reduces building's cooling energy usage
- Limits the building's solar heat gain
- Decreases cooling load on HVAC equipment
- Eliminates the application of a coating, providing material and labor savings

### Ease of Application

### Multiple, Easy Application Options

- One-step reflective surface and waterproofing installation
- Multiple application options, including hot, cold and torch
- Available on a variety of StressPly® membranes
