

# R-Mer® Lite

## Panelized Wall System

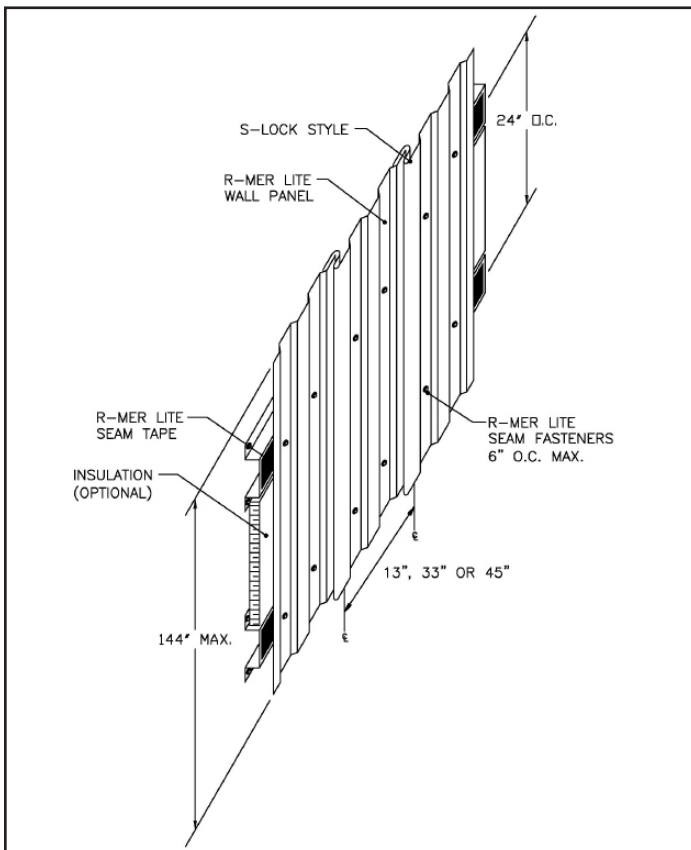

### OVERVIEW & FEATURES

The R-Mer® Lite wall panel system is a high-gloss white, factory painted, Galvalume® steel wall covering system with a tridimensional movement-absorbing design and a unique interlocking panel seaming mechanism. The wall covering system is engineered to be securely anchored to a Galvalume steel hat channel after prior engagement of the S-locked hemmed side. This system is designed to be water resistant on vertical surfaces only.

### PANEL PROFILE

# R-Mer Lite

## FEATURES

- Attachment device holds screws without the possibility of fastener backout. Bridging effect of nailer design levels out irregular wall surfaces making installation faster and finish detailing easier.
- System internally absorbs movement and stresses encountered without transmitting them among its components.
- Panels can be ordered up to 12' and are easily job sized to exact configurations and dimensions.
- System is installed with full interlocking side seams making joints resistant to driven rain and water runoff.
- System allows full vapor migration around and throughout the wall.

## DESIGN CHARACTERISTICS

- 26 or 30 gauge, Galvalume® Steel, 33" or 45" width, stucco embossed, 1" mesas, in SMP White.
- 26 gauge, Galvalume® Steel, 13" width, stucco embossed, no mesas, in SMP White. Designed for additional rigidity, with no exposed fasteners.
- Standard Color: White
