

Traffic Coatings

Dura-Walk® 2K

Traffic Coating System

Dura-Walk 2K is a two-component, polyurea waterproofing system used in pedestrian and vehicular applications where excellent weathering, toughness, fast cure times and solvent resistance are needed.

Superior Protection

- Impact and abrasion resistance
- Waterproofing
- UV protection

Low Odor Polyurea

- Ideal for odor-sensitive applications
- Aliphatic coating system
- Exceptional strength and durability

Chemically Cured

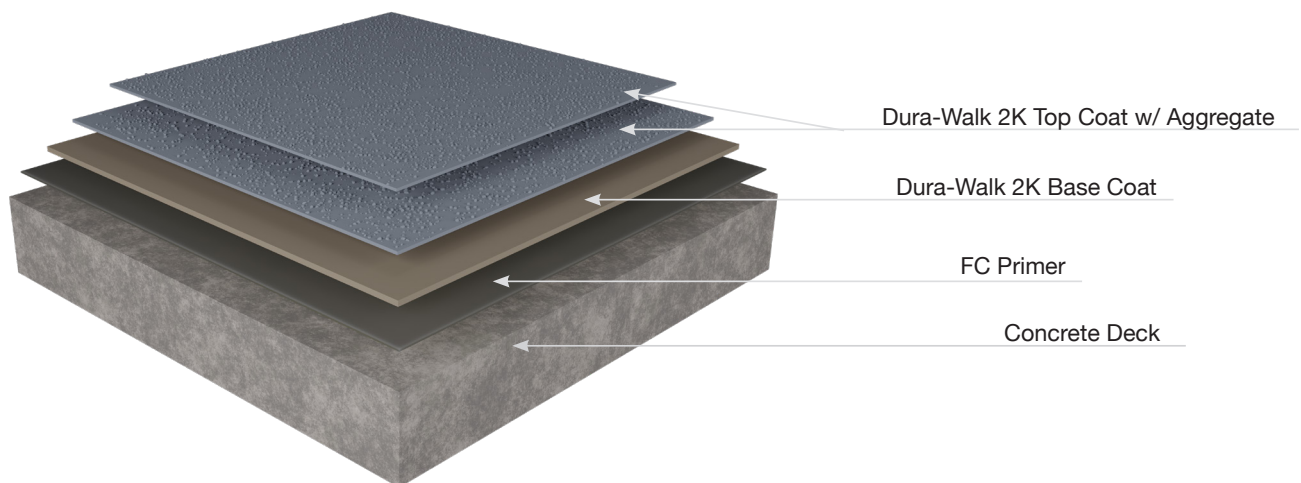

- Fast-curing
- Less time between coating applications
- Labor savings

Traffic-grade waterproofing.

Ideal for building-occupied applications.

Cures quickly for faster installations.

Features & Benefits	
Superior Protection	
Long-term Performance	Dura-Walk 2K helps waterproof and protect the concrete structure and its vulnerable steel components within.
Waterproofing	Monolithic membrane makes it easy to waterproof difficult details and create a seamless waterproofing membrane.
UV Protection	Each polyurea component of the traffic grade waterproofing system is aliphatic, extending the system's life.
Low Odor Polyurea	
System Design	100% solids waterproofing base layer and high solids, impact, and wear-resistant top coat.
Low Odor	Perfect solution for odor sensitive areas like campuses, hospitals, or busy metro areas.
Chemistry	Dura-Walk 2K's two-component formulation allows for chemical curing as opposed to moisture-cured, resulting in more consistent results and cures times
Chemically Cured	
Fast Curing	Helps prevent complications from unpredictable weather events, expanding installation windows.
Less Down Time	Dura-Walk 2K allows for multiple application steps per day providing less downtime for construction crews and, therefore, labor savings for the customer.
Project Duration	Quick project completion means decreased time for closures and inconvenience to the customer.
