R-Mer[®] Force Coping

R-Mer Force Coping brings remarkable strength and an architecturally-pleasing look to a tried and true family of metal edge products designed to protect the vulnerable conditions around a roof perimeter. Utilizing anchor chairs and a simple snap-on design, the R-Mer Force Coping requires zero exposed fasteners protecting the roofs edge from water infiltration, with no crimping required, reducing labor efforts.

Architecturally-Pleasing Look

- Customizable coping sizes
- Radius designs available
- Flush face design for a modern look

High-Performance Design

- Tested to withstand severe wind uplifts
- Zero exposed fasteners for long-term performance and lower preventative maintenance

Easy to Install

- Pre-punched anchor chairs provide guess-free installation
- Rotate and snap-on design in easy to manage 10' lengths

Protect one of the most vulnerable areas of your building envelope against wind damage.

Enhance your building's appearance.

Safe and simple installation.

R-Mer® Force Coping

Features & Benefits	
Superior Performance	
Watertight	Anchor chairs and a snap-on design eliminate the need for exposed fasteners.
Strong	16 GA steel anchor chairs fastened at 40" o.c. provide exceptional wind uplift ratings. Garland's strongest coping to date.
Thermal movement	With no fasteners penetrating the coping cap, the material is allowed to expand and contract in extreme weather conditions, further reducing the chance of warping or oil canning.
Easy Installation	
"Snap-on" design	With just a snap, R-Mer Force Coping is in place, eliminating a time-consuming fastener step.
No-through fasteners	"Snap-on" design eliminates the need for exposed fasteners through the coping cap.
Accessories	Inside and outside pre-manufactured mitered corners, end caps, transitions, and tees can all be configured to the edge details for versatility on a multitude of roofs.
Beautiful Aesthetics	
Enhanced appearance	Achieve a modern, elegant look for your building's edge in a range of colors, including cool roof colors* that reflect UV light and can contribute to energy efficiency.
Material type	Available in aluminum and steel in 16 standard Kynar® colors and an array of premium color options.
