

Accessories

KEE-Stone[®] Prefabricated Accessories

Overview

KEE-Stone certified prefabricated accessories are factory welded from KEE-Stone NF 60, a reinforced, ASTM D 6754 compliant membrane utilizing Elvaloy[™] KEE (Ketone Ethylene Ester). These components are used on a variety of details. Installation is fast and easy with no cutting or stretching required, reducing rooftop labor for a high-performance installation.

Application

Garland's KEE-Stone accessory components are sealed in place using conventional hot-air welding techniques. Prior to hot-air welding, acetone wipe the KEE-Stone membrane that will receive the flashing accessory to remove any contaminants. Probe all completed welds to verify a secure bond. Use the KEE-Lock Water Cut-Off Sealant where applicable. Contact Garland's technical department for system specific questions.

Storage

Store pre-molded accessories in a cool, dry area until they are ready to be installed. Materials that have been exposed to the weather or contaminated with dirt must be properly cleaned and prepared prior to installation.

Properties and Characteristics

Thickness	0.060" (1.52 mm)
Color	White
Material	KEE, Reinforced

Eco-Facts	KEE-Stone (Initial)	KEE-Stone (3 yr aged)
Reflectance	0.87	0.75
Thermal Emittance	0.88	0.88
SRI	110	93
