

OVERVIEW & FEATURES

R-Mer Clad Flat Stock is a heat weldable, thermoplastic PVC, ELVALOY™ laminated steel sheet, designed for use as an accessory component for wall, fascia or roofing applications for all KEE-Stone® Roofing Systems.

The flat stock is comprised of a 24 gauge G-90 galvanized steel sheet, with a layer of 25 mil PVC, ELVALOY™ thermoplastic roofing membrane securely laminated to the top surface. The laminated surface helps extend the monolithic nature of a KEE-Stone membrane roofing system to all metal flashing profiles.

Superior Construction – Provides a hot air weldable surface to the metal flashing, the thermoplastic surfacing protects the base metal from environmental elements and accents the aesthetics of the finished roof system.

Labor Savings – Streamlines several critical installation steps and allows for the direct welding of the KEE-Stone membrane to the laminated metal surface, which eliminates the need for time-consuming adhesives and their associated setup and cure times. The material is easy to cut and form, simplifying the creation of various custom edge and flashing sizes and profiles, thus reducing the fabrication effort required.

Technical Data	R-Mer KEE-Clad Flat Stock
Metal Substrate	24 Gauge G-90 Galvanized Steel
Film Thickness	25 mils
Available Colors	Bright White
Sheet Dimensions	4' x 10'
