

Silver-Flash®

Silver-Flash is a cold-applied, silver asphalt-based trowel-grade mastic designed to reduce labor on three-course, field repairs and flashing seams. Silver-Flash can reduce the roof completion time by 30 days, while protecting the mastic from harmful UV rays.

Silver-Flash - Finished in one day!

Flashing Bond - Asphalt Mastic - Day One

... Garla-Brite® Coating - 30 Days Later

Silver-Flash®

Features

Benefits

Cost Savings

Silver-Flash delivers a finished product in one application eliminating the need to come back to aluminize the flashings after 30-days

Multi-Purpose Application

Silver-Flash is a multi-purpose material ideal for maintaining flashings, repairing holes, splits or blisters in the roof surface

Reinforced for Long-Lasting Performance

Silver-Flash outlasts and outperforms conventional roof cements. It contains a unique reinforced formulation with additives that eliminates run or sag in vertical surface applications

UV Stable

Unlike traditional mastics, Silver-Flash is silver in color directly out of the pail, and reflects harmful UV rays away from the application, preventing premature degradation of the roof
