R-Mer Shield™ Standing Seam

R-Mer Shield's patented design and unrivaled strength allow it to withstand a wide range of temperature extremes and winds over 200 mph, providing outstanding waterproofing protection for decades.

High-Performance Design

- Withstands severe wind uplifts
- Unlimited thermal expansion and contraction

Labor Savings

- Installs in 2 directions at once
- Panels can be replaced individually

Watertight

- Sealant isolated from the clip
- Ensures long-term leak-free environment

Patented design to withstand extreme conditions.

System purpose-built with the contractor in mind.

The aesthetics and performance of standing seam metal.

R-Mer Shield™ Standing Seam

Features & Benefits	
High Performance Design	
Withstands severe wind uplifts	R-Mer Shield's high vertical seam and top rail design allows the panel legs to be held in place when uplift pressures act upon the panels, resulting in resistance in excess of 200 psf.
Resists extreme temperatures	Innovative design alleviates the effects of unsightly oil-canning and prevents seam buckling, resulting in a longer service life.
Labor Savings	
Bi-directional Installation	R-Mer Shield's symmetrical panel design allows panels to be clipped in from the center point outward in both directions, resulting in fast and easy installation.
Wider Panels	With its stronger clip, R-Mer Shield is able to have wider clip spacing resulting in fewer materials, lower cost of labor, and unrivaled strength.
Individual panel replacement	The symmetrical panel design means that should a panel require replacement, that single panel can be swapped out without compromising any adjacent panels or spending unnecessary time.
Watertight	
Sealant isolated from clip	Unlike most standing seam panels, R-Mer Shield isolates the seam sealant from contact with the clip, which protects it from breaking down as the panel moves over time and keeps the primary waterproofing element of the assembly intact longer.
Leak-free performance	R-Mer Shield is engineered for watertight performance for 30 years or more.

R-Mer Shield™
Available in
Steel, Aluminum, and
Stainless Steel

Advantages of R-Mer Shield™

Withstands wind
> 200 psf

Patented design for
leak-free performance

Designed for
faster installation

Resists oil-canning across
extreme temperatures

Longer service life
