

## Membrane Adhesive

# KEE-Lock™ Spatter Spray

KEE-Lock Spatter Spray is a solvent-free polyurethane foamable adhesive that dispenses quickly and evenly, saving installation time while bonding strong and consistent.

### Sustainable

- Low VOC
- No High Global Warming Potential (GWP) propellants

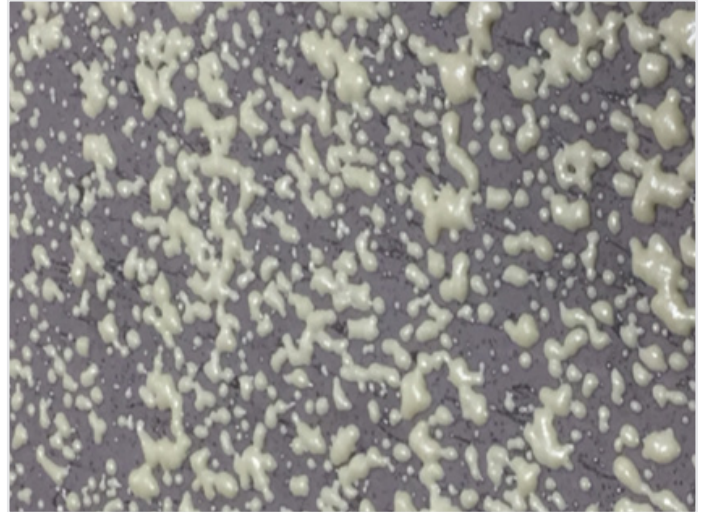

### Labor Savings

- Dispenses quickly
- Cures in minutes
- Forms an immediate, tight bond

### Strong, Consistent Bond

- More surface area bonded vs ribbons
- Immediate adhesion
- Proprietary static mixer

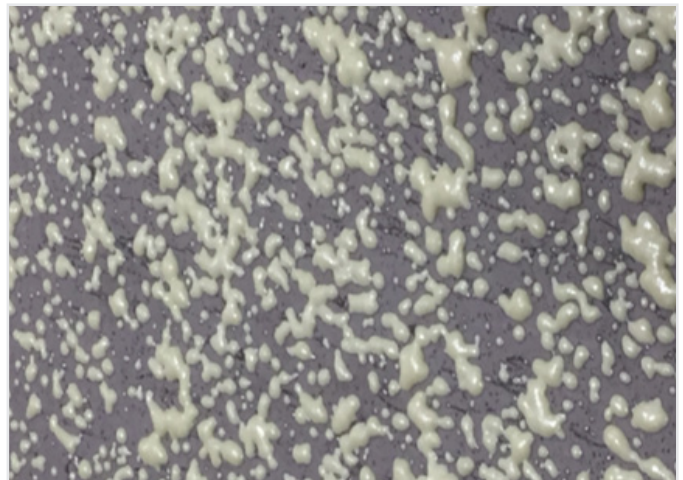

Save labor on thermoplastic assemblies.

Peace of mind with strong adhesion.

Get the most from a new KEE roof.

Membrane Adhesive

# KEE-Lock Spatter Spray

Features & Benefits	
Labor Savings	
Dispenses quickly	Apply up to 24 squares per set using our proprietary dual-purpose static mixer, disposable adhesive applicator, and 25-foot hoses, KEE-Lock Spatter Spray.
Cures quickly	With a skin time as low as 5-8 minutes in standard conditions, KEE-Lock Spatter Spray bonds fast.
Strong, Consistent Bond	
More surface area bonded	KEE-Lock Spatter Spray spreads evenly across the substrate, allowing for more of the capsheet to bond when compared to a traditional ribbon pattern.
Immediate adhesion	The foamed adhesive will appear as a homogeneous light amber color and begins to bond instantly..
Sustainability	
Low VOC	KEE-Lock Spatter Spray has VOCs less than 50 g/L per 2-component canister set.
No GWP propellants	The product is approved for use in all US and Canadian markets where ozone-depleting substances are regulated.
